AGAT

Empower Zoom productivity with AGI - AI Virtual Assistant

Automatically detect tasks in real-time during the meeting , generate summaries and analyze sentiments

Make meetings matter with AI-generated Summaries, Tasks and Sentiment analysis

Stop wasting time on meetings that don't end with clear written decisions and actionable items. AGI makes meetings productive by automatically creating summaries and actionable tasks in monday.com, Asana and Planner.

AGI enables companies to transform online meetings into productive outcomes where no details are left behind.

Generate Meeting Minutes Documents

Based on your own custom template, create meeting minutes including all attendees and tasks.

Automatic Task Detection

AGI creates tasks on the go, using AI to detect tasks from meeting and chat conversations. There is no need to speak to an assistant or manually capture the task.

Tasks Management Integration

AGI Integrate into Asana, Monday.com, Planner or a simple to-do list, which allows users to manage tasks directly in the task management system.
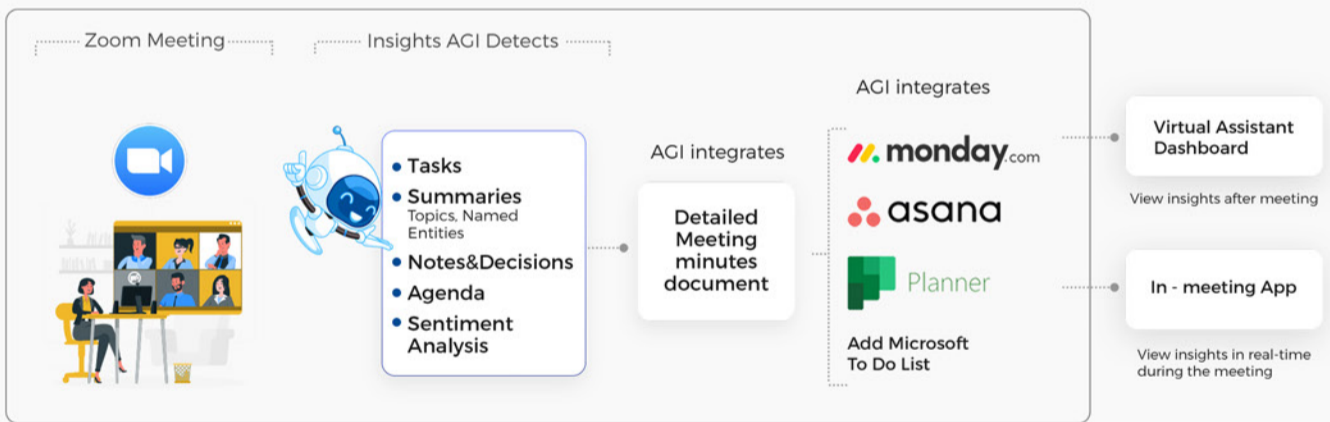

Analyze meeting sentiments

With a wide range of reports to identify meeting challenges, trending topics and users' issues such as unsatisfied or unhappy staff.

Generate summaries

Generate long or short summaries to get a quick overview of meetings.

Supports Any language

AGI supports virtually any language for AI detection.

Zoom Meeting → Insights AGI Detects
- Tasks
- Summaries — Topics, Named Entities
- Notes&Decisions
- Agenda
- Sentiment Analysis

AGI integrates → Detailed Meeting minutes document

AGI integrates → monday.com, asana, Planner, Add Microsoft To Do List

Virtual Assistant Dashboard — View insights after meeting

In - meeting App — View insights in real-time during the meeting

How Does AGI Work?

Users can choose to interact with AGI using the insights dashboard with the list of all of the users' meetings and chat insights or through the in-meeting app that is used to display tasks detected in real-time during the meeting.

1 AGI - Virtual Assistant Dashboard

Full view of detected tasks, summaries, minutes from all meetings.

2 In-meeting app

Displays tasks detected in real-time as the meeting happens.
