

**ChatGPT-like capabilities  
across all company data**

*Your data stays safe from Public AI*

<https://AGATSoftware.ai>

# Problems

## **Overwhelming business tools and data sources**

Lack of ability to attain a holistic view and provide decision-makers with precise, consolidated and real-time answers to Business questions.

### **Consolidate insights from:**

- Emails
- Chats
- Calls
- Meetings
- Support
- Dedicated Channels
- CRM
- Task management
- Wiki
- Documents

and more..

## **Sharing sensitive data with Public AI engines**

Regulatory and business restrictions prevent uploading sensitive data into public AI services (e.g., ChatGPT, Google Bard).

# Results

- **Losing business**
- **Missing goals**
