

Secure ChatGPT-like Capabilities across all company data

Your Data Stays Private from Public AI

The Problems

Overwhelming business tools, and data sources

Lack of ability to attain a holistic view and provide decision-makers with precise and consolidated real-time answers to business questions.

Sharing sensitive data with public AI engines

Regulatory and business restrictions prevent uploading sensitive data into public AI services (e.g., ChatGPT, Google Bard).

The Solution - BusinessGPT

Interact with all your company data

Allows users to ask questions and generate new content based on all your data sources:

Secure and private on-prem/private cloud solution

No need to expose your company data to public AI services, thanks to secure on-prem/private cloud deployment of the full AI solution.

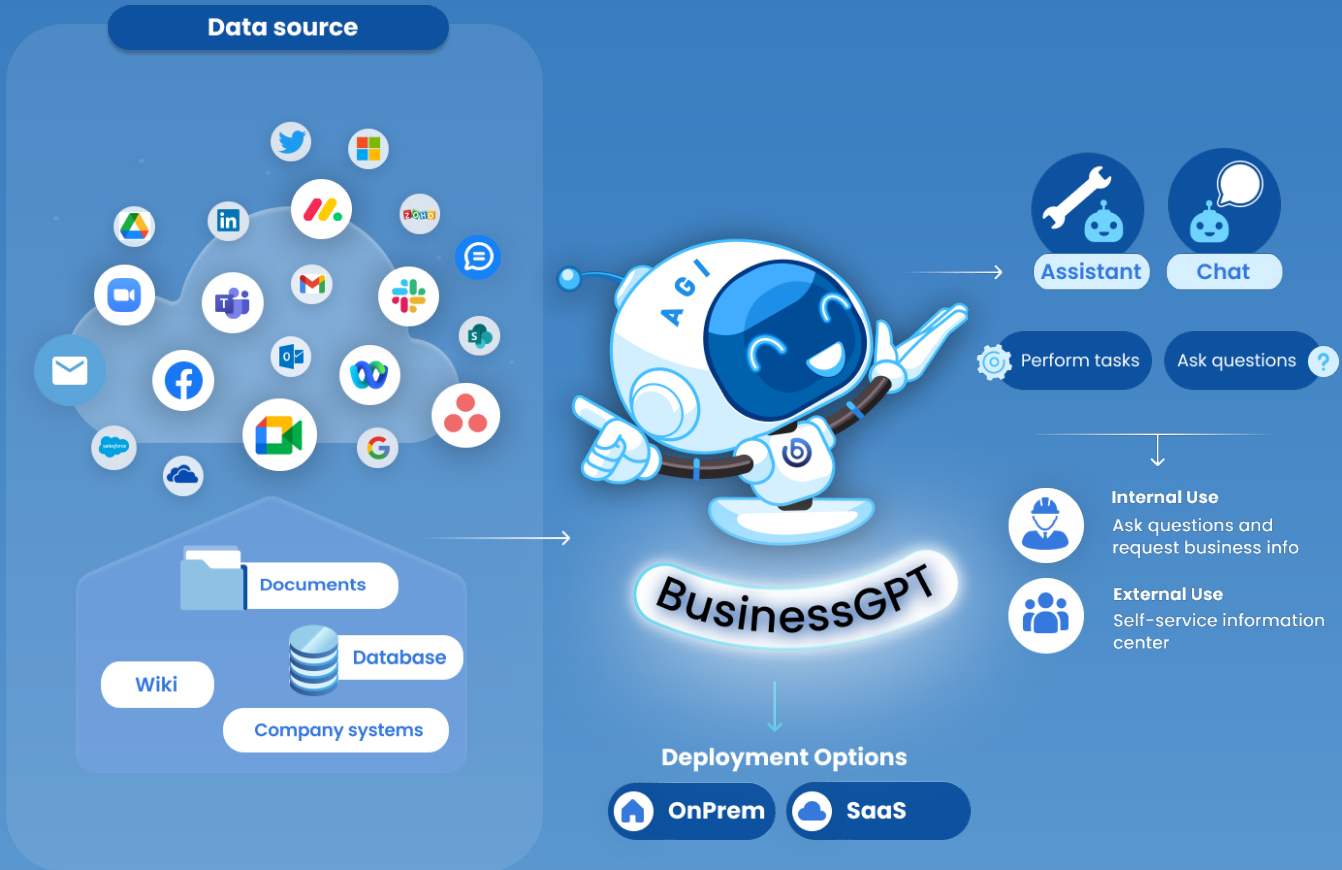

Sync and Control Data Permissions

Answers provided to users are strictly based on their existing synchronized access permissions in the source systems (CRM, Document Management, etc.)

Key Benefits

Empower Data-driven decisions

Unveil a holistic view by analyzing data from various sources for a complete perspective of your customers, projects, employees and risks.

Enhanced Customer Experience

AI chatbots offer a user-friendly interface, making it convenient for customers to interact and seek assistance without navigating complex systems.

Instant Information Retrieval

Access instant answers to your business questions, reducing the time spent searching for information.

Reduced Response Time

Chatbots offer rapid responses, minimizing customer wait times and enhancing overall satisfaction.

24/7 Availability

AI chatbots can provide instant assistance round-the-clock, ensuring customers get help whenever they need it, even outside of business hours.

Engagement and Marketing

Chatbots can initiate conversations, gather feedback, and even provide product recommendations, serving as an extension of your marketing efforts.

Use Cases

- **All Employees**
Improve productivity with quick and precise knowledge retrieval for better decision-making and work efficiency.
- **Managers**
Get status updates and insights on customers and projects.
- **Customer Success**
Gain insights from all customer communication and information.
- **Product Manager**
Obtain insights into customer needs and preferences.
- **Customer Support**
Get prompt answers about support tickets to understand customer issues and better identify customers that need attention.
- **Sales**
Stay updated with POC's and opportunities, request recommendations, and engage potential clients with automated human-like interactions.
- **Marketing Manager**
Create marketing materials based on existing content and documents.

BusinessGPT AI Assistant
